

Features

- Each chamber provides 1.3m³ of open area storage
- Low profile
- Integrated end caps
- Lightweight

Benefits

- Maximised storage space
- Allows for infiltration on sites with shallow footprint
- Cost savings; added chamber strength over conventional concrete structures
- **SFT** installed by hand without the need of heavy equipment

Configurations and Applications

ChamberMaxx is a modular system, resulting in the ability to meet a wide variety of site-specific requirements. Whether configured as an infiltration or detention system, ChamberMaxx is suitable for a wide range of applications such as:

- Commercial, Industrial and Residential development, infill and redevelopment and stormwater quality retrofit applications
- Incorporated into Water Sensitive Urban Design (WSUD), infiltration and rainwater harvesting and reuse systems

Installation

- Installed by hand
- ChamberMaxx is available locally, resulting in short lead times and installation support is provided by Ocean Protect
